Veto of Order granting locations for cables, conduits and manholes to Boston Edison Company on Broadway, Winchester Street, Irving Street, Holland Street, Thorndike Street, Kingston Street and Meacham Road,	124953

EXECUTIVE DEPARTMENT
Somerville, Massachusetts

S. LESTER RALPH
Mayor

6 July 1973

The Honorable, the Board of Aldermen
City of Somerville
Massachusetts

Gentlemen:

In accordance with the powers vested in me under Section 16 of the Charter of the city of Somerville, I hereby veto the order granted by your Honorable Board authorizing Boston Edison to install a cable along Broadway. I do so not only because I believe that the installation of the cable will cause disruption to our community, but more importantly because I believe that Boston Edison has neither carefully assessed the environmental impact of its proposed alignment nor adequately explored alternative alignments.

There are some obvious disadvantages in locating a cable line along a major street such as Broadway which runs through the center of a densely built-up community.

1) Because Broadway is a heavily residential and commercial street, construction will interfere with the day-to-day activities of homeowners and businessmen.

2) Because Broadway is heavily traveled (19,000 ADT) construction will result in serious traffic congestion. This will add to the unavoidable congestion already caused by the construction of the Ball Square bridge.

William J. Ronan

Document
Number

3) Broadway is already saturated with utility lines such as water, sewer, electric, phone and gas, The addition of the cable will increase the probability that the street will have to be dug up at future dates for repair or maintenance of these lines.

4) Less serious perhaps-if one is to rely on Boston Edison-but still an issue, is the possibility that the heat generated by the cable may cause as yet unforeseen problems.

5) By digging up a trench and then repaving it, Boston Edison will in effect be reducing the attractiveness of one of our major Thoroughfares. It would be particularly unfortunate to allow Boston Edison to do this just when the Conservation Commission is about to spend $50,000.00 and possibly more to beautify Broadway.

6) Boston Edison's major argument is that the Broadway alignment will provide the city with additional revenue. What they fail to stress is that any alignment, whether good or bad, will provide the city with revenue. The issue then is the price-measured in noise, inconvenience and congestion-that the city must pay for this revenue.

These preliminary findings suggest that perhaps even more serious problems would arise if Boston Edison were to go ahead with their proposed plans. What is clearly lacking from their work so far is a thorough environmental impact statement related to their proposed route. It should not be left up to the impacted city to have to engage consultants or use its staff's time to investigate the effects of the cable line. Rather it should be up to Boston Edison to carry out the necessary studies to reassure impacted cities that they have no reason to be concerned by the cable installation. That Boston Edison has not carried out such studies reflects poorly on their attitude towards communities.

Had Boston Edison carried out an environmental impact study, I believe that they would have concluded, just as the preliminary findings I have listed suggest, that the Broadway alignment is not in the best interests of our city. They would then have carefully explored more promising alignments, for example along I-93, and the Mystic River.

In short, I believe that the burden is on Boston Edison to prove to the city that their proposed align-

William J. Brown

Document Number

ment, of all feasible alternatives, is the least disruptive one. Otherwise, it is just as valid to conclude that economic considerations alone, and not the impacts on the community, have dictated their choice of route.

I ask you, in light of the objections I have raised, to reconsider your vote on the Boston Edison alignment along Broadway and to move instead to have Boston Edison carry out environmental impact studies of the effects of installing a cable along Broadway, I-93, and the Mystic River.

Respectfully yours,
S. Lester Ralph
S. Lester Ralph
Mayor
